PAYLOAD DRONE · SKU AX-FD2

SwellPro Fisherman MAX FD2

Waterproof IP67 heavy-lift fishing drone with 3.2 kg bait release, 1 km range and 4K camera.

BAIT PAYLOAD	WATERPROOF	RANGE	CAMERA
3.2 kg	**IP67**	**1 km**	**4K**

The **SwellPro Fisherman MAX FD2** is a waterproof heavy-lift drone built for anglers. It carries and releases **up to 3.2 kg** of bait and rig, flies out to **1 km**, films in **4K**, and carries an **IP67** waterproof rating, which matters for a drone that spends its life over salt water. It is a SwellPro product, which we supply alongside our industrial range.

Casting has limits. A drone takes a bait far beyond casting range and drops it exactly where you want it: past the breakers, beside a reef edge, over a channel or next to a school of baitfish you have just spotted on the camera. For surf and land-based game fishing, that can mean reaching fish you could not reach before.

The IP67 rating means the FD2 is protected against dust and temporary immersion. In practice, it survives spray, rain and the occasional water landing that would destroy a typical camera drone. Rinse it with fresh water after saltwater use, as you would any marine equipment.

Key features

IP67 waterproof. Built to survive rain, spray and water landings.

3.2 kg bait release. Carries heavy rigs and baits well beyond casting distance.

4K camera. Spot fish, structure and conditions from above.

1 km range. Reach distant drop-offs, reefs and gutters.

Marine-ready build. Designed for salt air and beach use.

Specifications
